## EXPERIENCE

### **Bamita, Lagos, Nigeria** - *Software Engineer*

APRIL 2020 - PRESENT

- Led a team to design, build, deploy and launch Bamita API and web application.
- Delegated tasks, achieving weekly and monthly goals to ensure projects are completed to standards.
- Documenting projects and API's that enables a better onboarding process for new developers and facilitates faster troubleshooting process.

**Tools:** Typescript, NodeJS, PostgreSQL, Gatsby, Flutter, AWS.

### **Andela, Lagos, Nigeria** - *Software Engineer*

MAY 2018 - MARCH 2020

- Worked with Andela internal teams and partners to design, develop and deploy some API services and frontend applications using cutting edge tools and techniques.
- Mentored and led a team of engineers to build internal applications.

**Tools:** Javascript, NodeJS, PostgreSQL, MongoDB, React.

### **OpenInvest, San Fransisco, USA** - *Software Engineer*

JANUARY 2019 - JANUARY 2020

- My team and I built and launched the Openinvest's Optimus UI, which enables advisers to invest in the web application.
- I worked in a team that built the Optimus design system, which increased development velocity and reduced time to market of products.
- I Contributed to the Openinvest web application, which makes it easy for Individuals to invest.

**Tools:** Javascript, Python, Typescript, NodeJS, React, Puppeteer

### **OpenMRS, Inc. Carmel, IN, USA** - *Software Engineer (Open-source contributor)*

AUGUST 2018 - NOVEMBER 2018

- I Supported the delivery of health care in developing countries by contributing to OpenMRS Order entry which is an application to support the creating of orders(Drug and Lab).
- I Improved OpenMRS documentation by tutorials on setting up, navigating and using the OpenMRS order entry application.

**Tools:** Javascript, React, Redux

---

## **Bank of Industry, Lagos, Nigeria** - *Software Engineer (Graduate Intern)*

NOVEMBER 2016 - DECEMBER 2017

- I maintained the internal company applications.
- I Trained new Information technology interns.

**Tools:** WordPress, Javascript, HTML/CSS

## **Timiweb, Lagos, Nigeria** - *Frontend Developer*

AUGUST 2015 - NOVEMBER 2016

- Built and maintained responsive websites for some businesses.

**Tools:** WordPress, HTML/CSS, Javascript, Python, Django

## **EDUCATION**

### **Udacity** - *Cloud DevOps Nanodegree*

2019 - 2020

Learned to design and deploy infrastructure as code, build and monitor CI/CD pipelines for different deployment strategies, and deploy scalable microservices using Kubernetes.

### **Udacity** - *Machine learning Engineer Nanodegree*

2019

Learned how to work with advanced machine learning techniques and algorithms and how to package and deploy your models to a production environment.

### **Federal Polytechnic Ilaro, Nigeria** - *Computer Engineering*

2011 - 2016

I studied computer engineering where I learned to evaluate, design and maintain computer hardware and software systems.

## **SKILLS**

Core: Javascript, Typescript, Node, React, Flutter, Python, AWS, PostgreSQL, MongoDB

Dabble with: Go, Vue, React-Native

Want to learn: C++, Lisp
