EDUCATION

UDACITY

CLOUD DEVOPS ENGINEER NANODEGREE
Nov 2019 - Feb 2020

UDACITY

MACHINE LEARNING ENGINEER NANODEGREE
Feb 2019 - Oct 2019

FEDERAL POLYTECHNIC ILARO

COMPUTER ENGINEERING
Sept 2011 - Aug 2016

EXPERIENCE

ANDELA | Software Engineer

May 2018 - present

- Accelerated social interactions in Andela by contributing to Andela social, which is an internal tool that enables social interaction and manages events within the organization.
- Built a business listing web application that connects businesses and prospective users.

OPENINVEST | Software Engineer

Jan 2019 - Jan 2020

- Increased Openinvest investment portfolios by building Optimus, which is OpenInvest's portfolio generation tool for Registered Investment advisers seeking to grow their businesses.
- Accelerated User Interface development time by building the OpenInvest design system which immensely reduced the time to market of products.

OPENMRS | Frontend Engineer

Aug 2018 - Nov 2018

- Supported the delivery of health care in developing countries by contributing to OpenMRS Order entry which is an application to support creating of orders(Drug and Lab).
- Improved documentation by creating documentation and tutorials on setting up, navigating and using the OpenMRS order entry application.

PROJECTS

Weconnect

WeConnect is a platform that brings businesses and individuals together. This platform creates awareness for businesses and gives the users the ability to write reviews about the businesses they have interacted with.

Tech: Javascript, Node, React, PostgreSQL, Heroku

Github: https://github.com/rhotimee/weconnect

Website: https://weconnect-business.herokuapp.com/

Commint Bukka

Commint bukKa is a web application for food ordering and delivery

Tech: Javascript, Gatsby, Firebase, Netlify

Website: https://commintbuka.com/

Predict Stock Prices

This was my capstone project for Machine Learning Engineer Nanodegree Program. This project project predicts stock prices using S&P500.

Tech: Python, Keras, Scikit Learn

Github: https://github.com/rhotimee/Predict-Stocks/

Operationalize a Machine Learning Microservice API

This project serves out predictions (inference) about housing prices through API calls

Tech: Python, Flask, Docker, Kubernetes, AWS

Github: https://github.com/rhotimee/ml-microservice-kubernetes

Openmrs Owa Orderentry

I contributed to OpenMRS an open-source project to develop software to support the delivery of health care in developing countries.

Tech: React, Redux, Javascript

Github: https://github.com/rhotimee/openmrs-owa-orderentry
